Contents of Volume 5

Volume 5 Number 1 January/February 1991

Review: Structural chemistry of organotin carboxylates: a review of the crystallographic literature 1
E R T Tiekink

Studies of the uptake and binding of trace metals in fungi. Part II. Arsenic compounds in *Laccaria amethystina* 25
A R Byrne, M Tušek-Žnidarič, B K Puri and K J Irgolic

Total surface areas of Group IVA organometallic compounds: predictors of toxicity to algae and bacteria 33
G Eng, E J Tierney, G J Olson, F E Brinckman and J M Bellama

Synthesis, characterization and catalytic activity of $Rh(PPh_3)_2(en)Cl$ complex 39
D T Gokak, B V Kamath and R N Ram

Antifungicidal, antibacterial and antifertility activities of biologically active heterocyclic thiosemicarbazones and their coordination complexes with the dimethylsilicon moiety 45
D Singh, R B Goyal and R V Singh

A synergistic organoiron flame-retarding/smoke-suppressing system for ABS 51
P Carty and S White

Laser evaporation of some solid organosilicon polymers 57
J Pola, J Vitek, Y P Polyakov, L E Guselnikov, P M Matveychev, S A Bashkirova, J Tláskal and R Mayer

Short paper: The structure-activity relationships of cyclopentadienyltitanium(IV) complexes of 1,3-dihydro-1,3-dioxo-α-(substituted)-2*H*-isoindole-2-acetates 65
P N Saxena, A K Saxena, S Saxena and A K Rai

Book Reviews 69

Volume 5 Number 2 March/April 1991

Foreword

Analytical methods for airborne arsine, silane and dichlorosilane by adsorption sampling and AA spectrophotometry 71
Y Matsumura, M Ono-Ogasawara and M Furuse

Sedimentary siloxanes: a depositional history 79
R E Pellenbarg and H W Carhart

Production of methyltin compounds related to possible conditions in the environment 83
T Hamasaki, H Nagase, T Sato, H Kito and Y Ose

Structure–activity relationships for organotin compounds on the red killifish *Oryzias latipes* 91
H Nagase, T Hamasaki, T Sato, H. Kito, Y Yoshioka and Y Ose

Research on tributyltin in Australian estuaries 99
G E Batley and M S Scammell

Communication: Detection of environmental polyorganosiloxanes (silicones) by silicon-29 NMR spectroscopy 107
J M Bellama, S R Meyer and R E Pellenbarg

Refractory arsenic species in estuarine waters 111
A M M de Bettencourt and M O Andreae

Determination of arsenic and arsenic compounds in natural gas samples 117
K J Irgolic, T D Spall, B K Puri, D Illger and R A Zingaro

Leaching of organotin compounds from poly(vinyl chloride) (PVC) material 125
Ph Quevauviller, A Bruchet and O F X Donard

Short paper: Tolerance of aggressive and non-aggressive isolates of *Ceratocystis ulmi* to organotin fungicides 131
G Eng and A D W Acholonu

Communication: Silicone curing and polyurethane preparation promoted by latent organotin catalysts 135
B Jousseaume, V Gouron, M Pereyre and J-M Frances

Book Reviews 139

Volume 5 Number 3 May/June 1991

The use of metallocenic esters of *N*-hydroxysuccinimide for metallohapten synthesis 143
I Lavastre, J Besancon, P Brossier and C Moise

Determination of butyltin species by GC/atomic emission spectroscopy 151
B F Scott, Y K Chau and A Rais-Firouz

A thermal analytical study of some mono- and di-organotin oxides and carboxylates 159
S J Blunden, R Hill and S E Sutton

Catalytic ethylation of alkylbenzenes at high pressure 167
L Assadourian and G Gau

Speciation for analysis of organotin compounds by GC AA and GC MS after ethylation by sodium tetraethylborate 173
J R Ashby and P J Craig

Synthesis, characterization and *in vitro* antitumour properties of complexes of bis(alkoxycarbonylmethyl)tin dibromides with bidentate nitrogen ligands 183
Z Zhang, H Pan, C Hu, F Fu, Y Sun, R Willem and M Gielen

Active sites, nature and mechanism of carbon dioxide–propylene oxide copolymerization and cyclization reactions employing organozinc–oxygen catalysts 191
W Kuran

Synthesis, characterization and *in vitro* antitumour activity of di-*n*-butyltin(IV) derivatives of some aromatic carboxylic acids, including aspirin 195
A Meriem, R Willem, M Biesemans, B Mahieu, D De Vos, P Lelieveld and M Gielen

Short paper: X-ray photoelectron spectroscopy and electrical conductivity studies of metallophthalocyanine sheet polymers 203
H Singh Nalwa

Volume 5 Number 4 July/August 1991

Foreword

Review: Organometallic chemistry related to applications for microelectronics in Japan 207
H Sato

Syntheses and electrochemical behaviour of novel dmit or dmio (dithiolato) cobalt(III) complexes with a η^5-cyclopentadienyl or η^5-pentamethylcyclopentadienyl ring 221
H Ushijima, S Sudoh, M Kajitani, K Shimizu, T Akiyama and A Sugimori

Synchrotron radiation-stimulated photochemical reaction and its application to semiconductor processes 229
T Urisu, J-I Takahashi, Y Utsumi and H Akazawa

Photochemistry of iron pentacarbonyl adsorbed on titanium dioxide 243
Y Ukisu, S Sato and T Ohmori

Laser photodissociation of organometallic compounds on a cryosubstrate 247
M Kawasaki and N Nishi

Quadratic nonlinear optical properties of ruthenium(II)-bipyridine complexes in crystalline powders 257
H Sakaguchi, T Nagamura and T Matsuo

Photochemical formation of silver–gold (Ag–Au) composite colloids in solutions containing sodium alginate 261
T Sato, S Kuroda, A Takami, Y Yonezawa and H Hada

Dissociative photoionization of $A_{12}(CH_3)_6$ and $Al_2(CH_3)_3Cl_3$ in the range 40–100 eV 269
S-I Nagaoka, I Koyano, T Imamura and T Masuoka

Mass spectrometric studies on the decomposition of trialkylgallium on GaAs surfaces 277
Y Ohki and Y Hiratani

Wavelength dependence in photochemical vapor deposition of aluminum film using dimethylaluminum hydride 289
M Hanabusa and M Ikeda

Thin films of peroxopolytungstic acids: applications to optical waveguide components 295
K Itoh, T Okamoto, S Wakita, H Niikura, M Murabayashi

Highly efficient formation of metal and metal alloy particles from methyl metal compounds by a single pulse laser irradiation 303
N Shimo, M Fujita and H Kuma

XPS study on early stages of heat deterioration of silicon-containing aromatic polyimide film 309
H Sugitani, T Kikuchi, Y Sugimoto and T Saitou

The epitaxial growth of AlGaAs using highly purified trimethylaluminum 319
T Maeda, M Hata, M Isemura and T Yako

Photo-absorption and photochemical decomposition of copper and alkaline-earth β-diketonates as source gases of high-T_c superconducting films 325
T Hashimoto, K Kitazawa, M Nakabayashi, T Shiraishi, Y Suemune, T Yamamoto and H Koinuma

The epitaxial growth of GaAs using alkylarsine: part 2. Molecular orbital calculation 331
Y Kikuzono and T Maeda

Physicochemical properties of dimethylzinc, dimethylcadmium and diethylzinc 337
Y Kuniya, Y Deguchi and M Ichida

Volume 5 Number 5 September/October 1991

Review: Organometallic materials for nonlinear optics 349
H S Nalwa

Hydrogermylation of phenylacetylene catalyzed by onium chlorometallates 379
E Lukevics, D I Barabanov and L M Ignatovich

Synthesis and spectroscopic characterization of organotin derivatives of *N*-benzoylglycylglycine 385
G Ruisi and M T Lo Giudice

Tributyltin analysis in seawater by GC FPD after direct aqueous-phase ethylation using sodium tetraethylborate 393
P Michel and B Averty

Speciation of butyltins in fish and sediment by means of gas chromatography with flame photometric detection 399
I Martin-Landa, F Pablos and I L Marr

Evaluation of the genotoxic potential of six triorganotin compounds by the mouse micronucleus and spermhead abnormality tests 409
S C Kook, N M Kwong and V G K Das

Synthesis of poly-yne polymers containing transition metals, disilane, disiloxane and phosphine groups in the main chain 417
S Kotani, K Shiina and K Sonogashira

Short paper: Conversion of arsenobetaine by intestinal bacteria of a mollusc *Liolophura japonica* chitons 427
K Hanaoka, T Motoya, S Tagawa and T Kaise

Short paper: Evaluation of extraction techniques for butyltin compounds in sediment 431
S Zhang, Y K Chau, W C Li and A S Y Chau

Short paper: Conversion of arsenobetaine to dimethylarsinic acid by arsenobetaine-decomposing bacteria isolated from coastal sediment 435
K Hanaoka, S Tagawa and T Kaise

Short paper: Structural effects on the antitumour activity of organotin compounds 2. Further diaryltin dichloride complexes with nitrogen-donor ligands 439
B N Biddle and J S Gray

Volume 5 Number 6 November/December 1991

Announcement 443

Review: On the mechanism of catalytic hydroxylation of aromatic hydrocarbons by hydrogen peroxide 445
E A Karakhanov, S Y Narin and A G Dedov

Functionalization and further crosslinking of the Nicalon polycarbosilane based on its metalation with the n-butyllithium–potassium t-butoxide reagent 463
D Seyferth and H Lang

A mechanism of photo-oxidative destruction for polyethylene polymers in the presence of ferrocene derivative additives 471
E A Kalennikov, S I Kuzina, V S Yuran, A I Mikhailov, L V Popova, A A Pendin and V N Babin

Formation of arynezirconocenes from substituted diaryl bis(t-butylcyclopentadienyl)zirconium: application to the synthesos pf new functionalized *ortho*-dichalcogenobenzene compounds 479
J Bodiguel, P Meunier and B Gautheron

Biomonitoring in the mercury-contaminated Wabigoon–English–Winnipeg River (Canada) system: selecting the best available bioindicator 487
J W Parks, P J Craig, B P Neary, G Ozburn and D Romani

Synthesis, characterization and *in vitro* antitumor activity of dimethyl-, diethyl, and di-t-butyl-tin(IV) derivatives of substituted salicyclic acids 497
M Boualam, R Willem, M Biesemans and M Gielen

Fluorescent humic substances–arsenic complex in well water in areas where blackfooot disease is endemic in Taiwan 507
F-J Lu, H-P Hsieh, H Yamauchi, Y Yamamura

Short paper: Facile esterification promoted by the triphenylstibine–oxide phosphorus sulfide (Ph_3SbO/P_4S_{10}) system 513
R Nomura, S-I Miyazaki, T Nakano and H Matsuda

Short paper: Synthesis of triphenyl-phosphine, -arsine and -stibine derivatives of phenylmethinyltricobalt enneacarbonyls and their catalytic properties 517
Y-P Wang, Z-Q Lei, H-Y Feng and Y-H Liu

Short paper: Alkane activation by homogeneous palladium complexes 521
J K Beattie, A F Masters and M L Sparkes
